Use code: F-0209

## MOLD OF THE MONTH!

Mold of the Month 20% Off!

[Seamless Aluminum 3 x 3.5" Pillar](#)

## TIP OF THE MONTH:

Putting a stubborn metal candle mold in the freezer for a few minutes aids in the release of a stuck candle. At times I have forgotten to remove them from the freezer quickly enough and have had the candles freeze solid and crack or split in half once removed from the mold. Several years ago, I solved the problem by promptly taking them from the freezer and putting them in the refrigerator overnight to allow for a slow defrost. These candles I found did not crack and burned just fine!
